Connecting to the Mains Supply

Ensure that the power supply voltage is within the range of 100V-240V.

This unit is designed to use a power adapter or USB port.

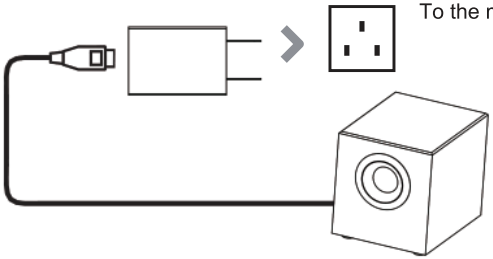
Unwind the mains cable to its full length.

Connect the mains plug to a mains socket.

Make sure the mains plug is fully inserted into the mains socket.

Connect the adapter to the unit via the DC Input socket.

(DC-5V-IN)



Ensure all audio cables are properly connected before inserting the power cable into the mains socket.

Unplug the power cord from the outlet when the unit is not in use for an extended period of time.

Bluetooth Operation

a beep will be heard

Pairing a Bluetooth Device for the First Time

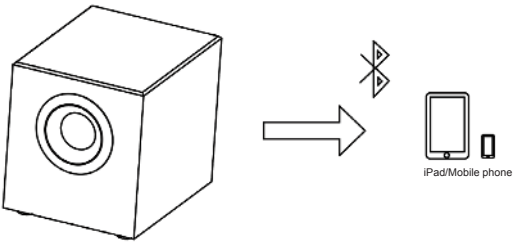
Select and press POWER/MODE button on the Subwoofer until Bluetooth mode is selected, indicated by a flashing blue light.

Using the native controls on your Bluetooth device, select the “Majority DX20” when prompted to choose a Bluetooth device.

When successfully paired and connected, a beep will be heard from the unit and the Pairing Indicator will display a solid blue light. After initial pairing,the unit will stay paired unless unpaired manually by the user, or until the device is reset.

To unpair, hold down the PAIR button for 3 seconds. You can now pair the device with another Bluetooth device.

In case your device will disconnect from DX20, or if you are unable to connect please start over again following the paring steps again.



If you encounter an issue with your DX20, please refer to the following checklist.

Issue	Possible Cause	Solution
Bluetooth does not connect / could not find Bluetooth device.	1.Speakers are already paired to another Bluetooth device. Product or phone Bluetooth has not updated scanned.	1. Make sure that the DX20 is not already connected to other devices via Bluetooth when trying to perform a Bluetooth search/connection. 2. If you are having issues connecting via Bluetooth, try turning off the product and leave it switched off for 15 seconds, then right after power on the device and search for a Bluetooth connection. To do this please switch the DX20 into Bluetooth Mode and try to connect to a new device.
Doesn't read USB stick.	1. Check if there are music files in the USB and the music format. 2.Check if the USB is damaged.	1 .Verify that the USB has a music file and can be reinserted. 2. Replace with a new USB stick.
Doesn't read SD cards.	1. Check if there are music files in the SD card and if the music format is supported. 2. Check whether the SD card is damaged.	1. Verify that the SD card has a music file and can be re-inserted. 2. Replace with a new SD card.
AUX-IN: No sound on Line-In Mode	1. Check whether the 3.5mm LINE-IN cable is good quality	1.Retest with new lines. 2 Re-plug the line.
